As architects and interior designers we know how visualisation is important to better understand a project in every phase of the design process.

We are offering different solutions to fit all designers and client needs from photographic to cost effective images, from fully mounted rendering videos to live walktroughts.

PHOTOGRAPHIC INTERIORS

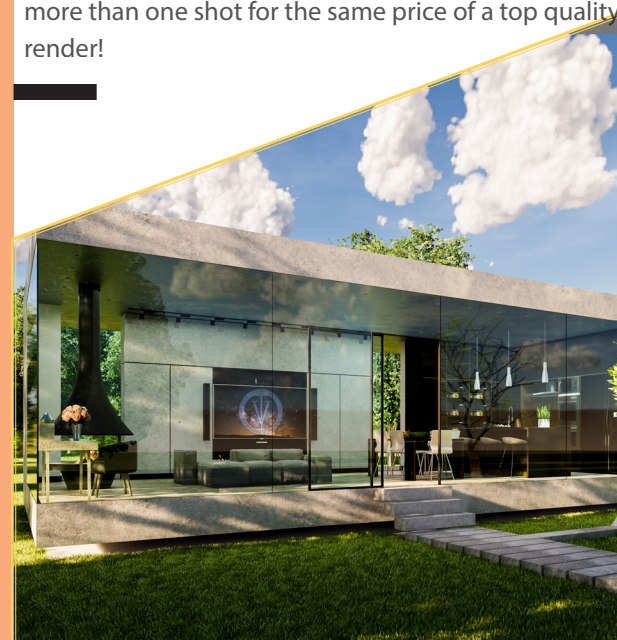

COST EFFECTIVE INTERIOR

COST EFFECTIVE

To meet the needs of all clients we are offering our set of cost effective renders.

Using different softwares we are able to produce good quality images in less time allowing you to have more than one shot for the same price of a top quality render!

COST EFFECTIVE EXTERIOR

HIGH QUALITY

Using the best softwares on the market we will deliver photographic renders with an accurate representation of materials and models.

A final touch dressing the model with decorative objects and realistic vegetation will bring life to your project!

VIDEOS

What is better than a still render?

A video of course!

We will show the best parts of your project with the appropriate background music always in Full HD videos (4k also available).

360° VISUALS

What is better than a flat render?

A full immersive 360° render!

Great to be shared on social media!

Use your smartphone to have a look around your project!

Fully compatible with all the Virtual Reality headsets!

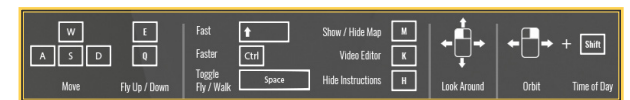

LIVE WALK THROUGH MODEL

A full immersion experience in your project!!!

Our live walk-through allows you to navigate the model in real time using just your mouse and keyboard.

- Great for presentations and reviews!
- Customizable loading page, file icon and logo!
- Change the daytime in real time!
- Background noise or music from sound sources!
- Switch from a white model to a rendered model in one click!

Available on Windows only.

You need an NVIDIA or AMD graphics chip (OpenGL 4.2 compatible) with a minimum of 2GB memory:

NVIDIA GeForce GTX 460/Quadro 2000 and newer

AMD Radeon HD 6800 series/FirePro W5000 and newer
